SUMMARY

Frontend Focused MERN Stack Web Developer with hands-on experience building scalable, production-grade web applications using React.js, Next.js, JavaScript and Tailwind CSS. Skilled at translating Figma designs into pixel-perfect, accessible UI components and integrating RESTful APIs for real-world platforms, with working knowledge of backend technologies such as Node.js and Express. Passionate about performance optimization, clean code architecture, and delivering experiences that users love.

WORK EXPERIENCE

MERN Stack Developer | OZ Techwork

November 2025 – Present

- Contributed to the maintenance and improvement of **WiseWheel**, a car buy/sell platform, by debugging UI issues, analyzing a large existing codebase, and implementing stable fixes to enhance user experience and platform reliability.
- Collaborated with the team to identify performance bottlenecks and improve frontend workflows without disrupting existing production features.
- Developed and scaled the frontend of a role-based **HRMIS** platform using React.js, Tailwind CSS, and Redux Toolkit, building modular dashboards for Employee Management, Attendance, Leaves, and Finance.
- Integrated RESTful APIs, managed complex global state, and implemented structured UI architecture to support real-time data handling across multiple modules.
- Utilized AI-assisted development tools (Claude, GitHub Copilot) to debug complex issues, optimize component architecture, and accelerate development efficiency.
- Collaborated with DevOps teams for website integration and deployment.

MERN Stack Developer | Self Employed

August 2025 – October 2025

- Architected and deployed multiple full-stack applications using the **MERN stack (MongoDB, Express, React, Node.js)**, managing the entire software development lifecycle from initial UI/UX design to backend API integration.
- Developed a high-performance personal portfolio featuring custom-built interactive components, clean visual hierarchy, and polished motion design using Framer Motion to showcase technical expertise.
- Created responsive user interfaces with React.js and Tailwind CSS, ensuring a seamless and high-quality experience on mobile, tablet, and desktop.

Frontend Web Developer | ICR

May 2025 – August 2025

- Developed and maintained responsive web pages using **HTML, CSS, and JavaScript**, ensuring cross-browser compatibility and high-fidelity layouts.
- Engineered **reusable React components**, including forms, navigation elements, and interactive UI modules to streamline the development process.
- Implemented client-side routing using **React Router** to manage seamless navigation and state transitions within single-page applications.
- Optimized frontend performance by refining asset loading and code structure, resulting in improved page speeds and a smoother user experience.

SKILLS

- FrontEnd** : React.js, Next.js, JavaScript (ES6+), Tailwind CSS, Bootstrap, CSS3, HTML5, Redux Toolkit, TypeScript, Framer Motion
- BackEnd** : Node.js, Express.js, MongoDB, Postman
- Tools** : Git, Git Hub, Figma, Git Bucket

PROJECTS

HRMIS

React.js · Next.js · Tailwind CSS · Node.js · Express.js · MongoDB · Redux Toolkit · JWT

Designed and engineered a robust, web-based **Human Resource Management Information System (HRMIS)** to centralize and automate core organizational processes. By developing a high-performance dashboard using React.js and Tailwind CSS, the platform provides a unified interface for managing employee records, real-time attendance tracking, and financial data. The result is a highly scalable solution that eliminates manual record-keeping, ensures data integrity through advanced form validation, and significantly streamlines administrative workflows for improved organizational efficiency.

ApniProfile

React.js · Tailwind CSS · Laravel · Redux Toolkit · Vercel

Developed ApniProfile, a full-stack SaaS platform that consolidates resumes, portfolios, and professional data into a single dynamic, shareable career link, eliminating the need for multiple disconnected resources. Implemented real-time profile updates and structured content rendering for a seamless recruiter experience. Designed and architected upcoming analytics features to track recruiter interactions, profile views, and engagement metrics, enabling users to gain actionable insights and improve their visibility.

Portfolio Website

React.js · Framer Motion · Tailwind CSS · Vercel

Designed and developed a high-performance personal portfolio from the ground up to showcase a professional technical profile and a collection of full-stack projects. By combining a minimalist, modern aesthetic with advanced motion design, the project successfully bridges the gap between clean visual hierarchy and high-end interactivity. The result is a seamless, engaging user experience that effectively highlights technical expertise and professional growth across all device types.

Silakot Stallionz

HTML · Tailwind CSS · JavaScript · WordPress Integration

Built a high-performance website for the Sialkot Stallionz using HTML, Tailwind CSS, and JavaScript, converting a Figma design into a pixel-perfect, fully responsive interface. Focused on delivering a modern, visually engaging experience with seamless performance across all devices, effectively representing the team's identity and digital presence.

EDUCATION

Virtual University of Pakistan | Bachelors in Computer Science

Lahore, Pakistan

Punjab College | Intermediate

Rahim Yar Khan, Pakistan
